

Shining Light on Utility-Scale Solar in the Shenandoah Valley

***Is your locality prepared for large energy proposals?
Ordinances - Site Construction - Fee Structure - Impact Analysis***

When Tuesday, June 18, 2019 from 9:00 a.m to 2:00 p.m. (Lunch provided)

Where Lord Fairfax Community College
(Corron Community Development Center, 173 Skirmisher Lane, Middletown, VA 22645)

The Shenandoah Valley is seeing a surge in applications for Utility-Scale Solar Projects. This workshop aims to help localities understand and develop policies and procedures to respond to these large and complex proposals.

Speakers bring experience from across the state. **Richard Street** is Senior Environmental Engineer for Spotsylvania County, which just approved the largest solar project on the East Coast. **Jonah Fogel**, of the UVA Environmental Resilience Institute, is gearing up programs to provide research and assistance to local governments. **Denise Nelson**, an environmental engineer with The Berkley Group, has consulted for southside localities who have fielded large solar proposals.

Who Should Attend: Local Officials & Staff including Administrators, Supervisors, Planners, Staff Engineers, E&S Managers, Stormwater Managers, Economic Development Staff, and Commissioners of the Revenue

To Register: Email: gcrigler@nsvregion.org Deadline: June 13, 2019

For Information: Sara Hollberg sara.hollberg@gmail.com, Contract Planner, Alliance for the Shenandoah Valley; or call the Northern Shenandoah Valley Regional Commission, [\(540\) 636-8800](tel:5406368800)

Hosted by the Northern Shenandoah Valley Regional Commission
with support from the Alliance for the Shenandoah Valley
