Roof Mount vs. Ground Mount

Pros:

- Utilizes unused space
- Often the cheaper option

Cons:

- Roof penetration
- Could require a new roof before installation

Pros:

- Positioned for optimal performance
- Easy access for maintenance

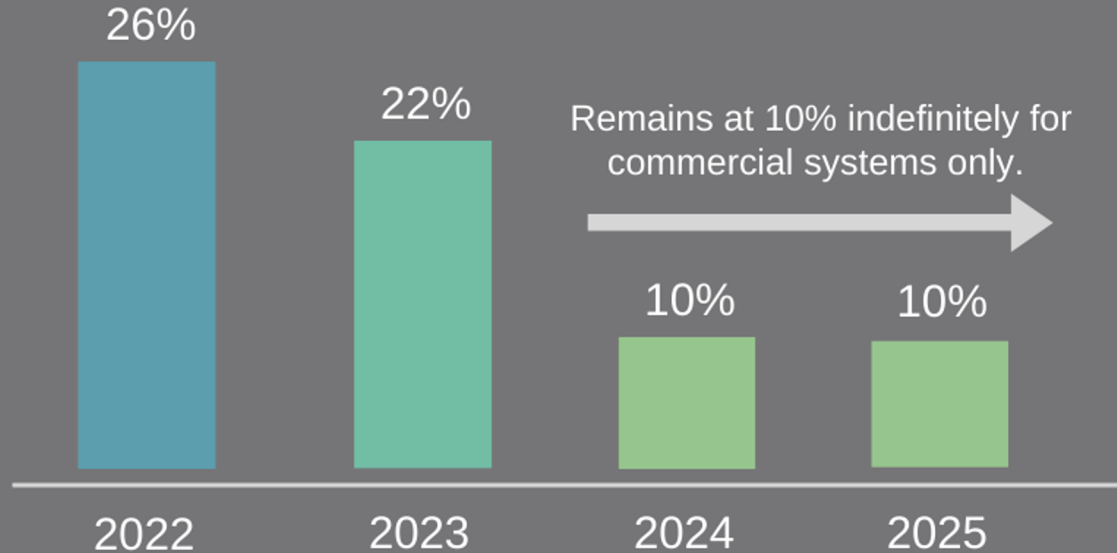

Cons:

- Installation costs are higher
- Limits the use of the land

HOW SRECS WORK

You get an
SREC for each
1,000 kWh
generated.

You sell those
SRECs at
market price.

The earnings
go right to
your pocket.
